Tailift VNA Benefit

Tailift VNA articulated forklifts offer several benefits that make them valuable to various warehouse and distribution centres.

Articulated forklift design

Enables Tailift to manoeuvre easily in very narrow aisles. Maximize warehouse space utilisation. Can do the combined job of a Counterbalance and Reach Truck for one price. Four-wheel stability works in all applications, both indoors and outdoors.

TrueRadius™ chassis

Unique Tailift curved shape at the rear of the chassis is designed to minimize rack and product damage.

Smoother operator experience

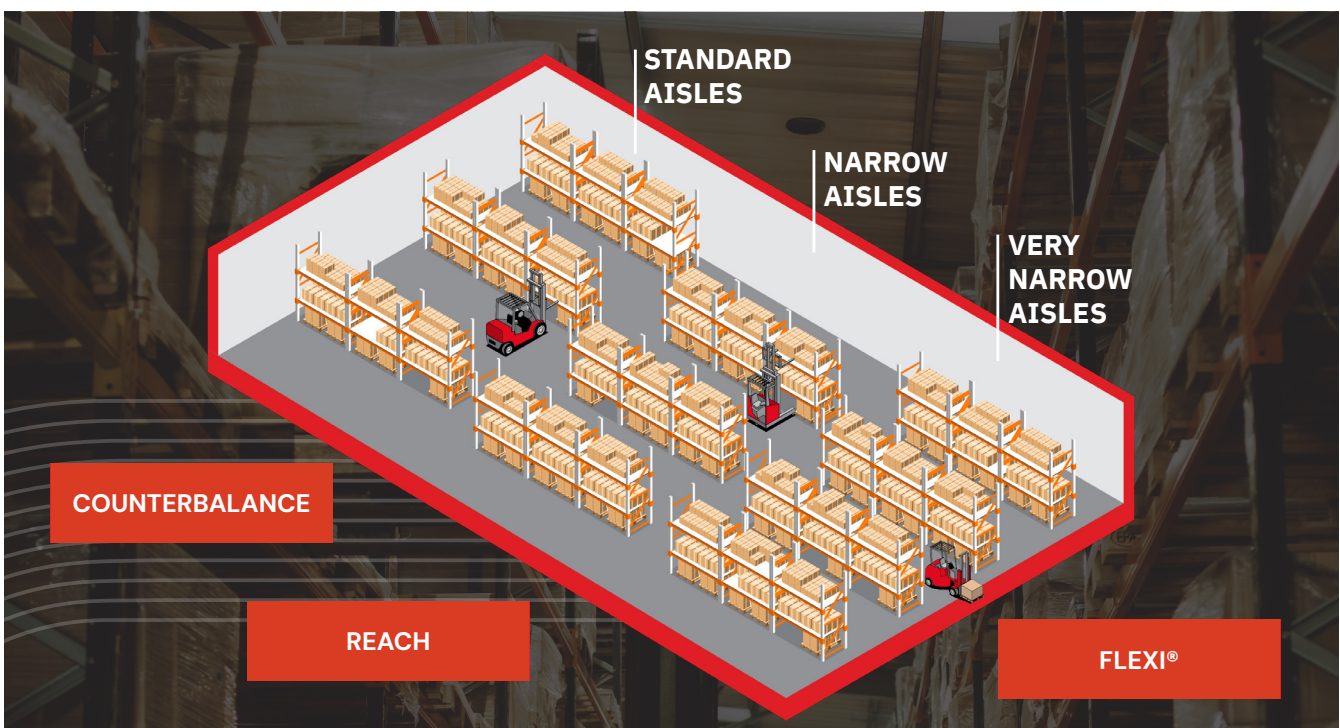

Separate drive, lift & steer motors for a smoother operator experience. Independent steer motor ensures no interference from hydraulic functions. Smooth front wheel drive with differential axle allows for the most efficient traction setup of any articulated forklift.

Maximum operator visibility

Twin post overhead guard and 'clear view' mast offering the best visibility of any articulated machine on the market. Tailift designs and manufactures all its own Triplex and Quad masts to maximize operators forward visibility.

Increased storage

By optimising previously inaccessible space in the warehouse aisles, Tailift can deliver: 30% increase in storage versus a conventional reach truck. 50% increase in storage versus a conventional counterbalance truck. In addition to the increase in storage, Tailift also delivers operational efficiencies by collecting directly from marshalling/unloading/loading areas without the need for additional MHE – One truck road to rack solution.

Tailift VNA 17N

The 17N is ideal for higher lift capacities with the same 40" chassis.

Unique 220° over-rotation™ and compact front-drive design

Tailift 17N can work in just 6 1/2 feet to GN9 (FEM) safe clearance standards.

3300lbs lift capacity

Designed to bring Tailift articulated space-saving and handling efficiency to warehouses.

Lift heights to 8.6 feet

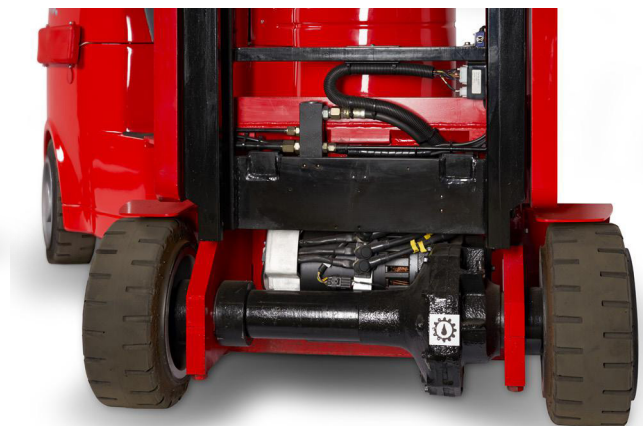

"Clear View" Triple mast with full free lift.

Operational performance

Ultra-narrow 40" wide chassis and 220° articulation feature combined with true four-wheel stability for fast, safe operation. Continuous drive to both front wheels.

Unique compact front axle

Maximize stacking aisle clearance, twin front wheel drive.

Tailift VNA 20S

The most popular model in our range.

Unique 220° over-rotation™ and compact front-drive design

Tailift 20S can work in just 7 feet aisles to GN9 (FEM) safe clearance standards.

4400lbs lift capacity

Designed to bring Tailift articulated space-saving and handling efficiency to larger capacity loads.

Lift heights to 34 feet

"Clear View" Triple mast with full free lift.

Operational performance

Narrow 48" wide chassis and 220° articulation feature combined with true four-wheel stability for fast, safe operation. Continuous drive to both front wheels.

Unique compact front axle

Maximize stacking aisle clearance, twin front wheel drive.

Tailift VNA Features

FRONT FACING BLUE
LED SPOTLIGHT

RED LED PERIMETER
SAFETY LIGHTING

SMARTSTOP™
SYSTEM

INTEGRAL SIDE
SHIFT

DOUBLE DEEP
FORKS

Tailift VNA Features

Tailift VNA optional extras:

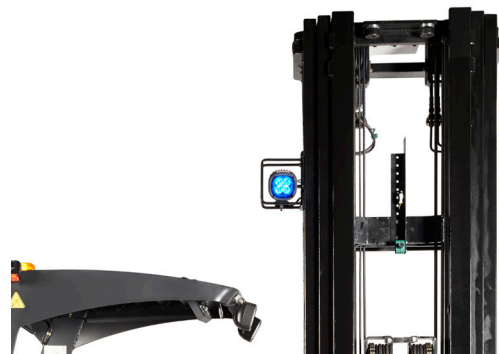

A range of lead acid batteries, through to fully integrated lithium-ion solutions

Double deep forks

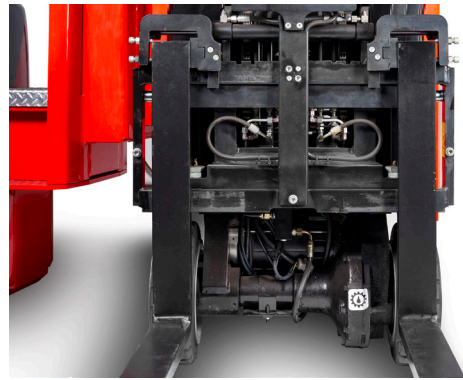

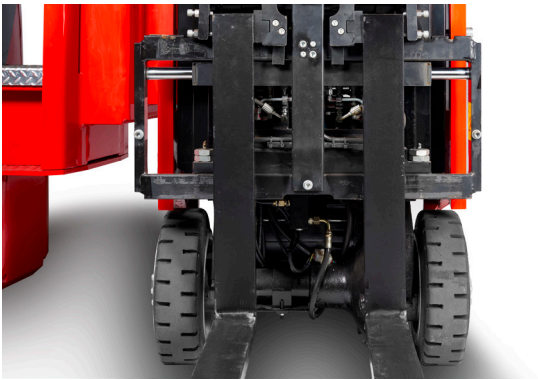

High visibility camera system

Front-facing blue LED spotlight

Tailift VNA Features

Integrated hydraulic fork positioner

Red LED perimeter safety lighting

Plus a variety
of attachment
configurations
and many more
